

Preparing for your COVID-19 Vaccination Appointment

The first step to getting vaccinated is confirming you are in an eligible group. Once you confirm eligibility, you can book your appointment. To check who is eligible and to schedule appointments visit mass.gov/covidvaccine

What to know before you go

- The vaccine is free to all individuals.
- You must make an appointment to get a vaccine.
- The vaccine requires two doses. You should make sure you have a second appointment scheduled from the same site, or know how to schedule it, before leaving your first appointment.
- You can get a vaccine even if you do not have insurance, a driver's license, or a Social Security number.
- You must confirm you are eligible for your phase. Learn how below.

What you need for your appointment

Confirm your eligibility

To get vaccinated in Phase 1 or 2, you will need to confirm that you are part of a currently eligible group within those phases. This is called “attesting.” You might attest online or over the phone when booking. If you are not asked when booking, you will use a form. Locations should have an attestation form, however, you can fill out the state’s form and bring it with you to your appointment to be prepared. Get the form at mass.gov/covidvaccineguide

Additional documents

Your vaccination location may list the below items as necessary, however, that only applies to people who have them. You can still receive the COVID-19 vaccine without insurance or an ID.

- An ID with your name, if you have one, to verify your name in the vaccination system.
- Health insurance card, if you have one. Your insurance will be billed at no cost to you.

If you are going to a “local vaccination location” (yellow stars on map), those are for workers or residents of select cities and towns. They will include what you need to bring in their “special instructions” when scheduling your appointment.

Keep others safe

It will take time to get the COVID-19 vaccine rolled out and get everyone vaccinated. Before, between doses, and when you are fully vaccinated, continue to use all tools available to stop the spread.
